

OHIO REPLACEMENT SSBN BUILDING THE FUTURE – TODAY

**THE WORLD DEMANDS DETERRENCE...
THE TIMES DEMAND AFFORDABILITY**

Electric Boat has demonstrated a new method of constructing the next-generation SSBN that will save millions of dollars per ship, a decade before work begins. One Navy admiral called it 'The most successful prototype program I have ever been involved with.' It's part of the Navy-EB commitment to controlling costs of a program vital to national security.
