

# ANOTHER SMASHING SUCCESS

## **Congratulations To The Navy, The Captain And Crew.**

On Saturday, October 10, General Dynamics Electric Boat hosted a christening ceremony for the submarine Illinois (SSN786), the 13th ship of the Virginia Class, at our Groton, Connecticut, shipyard.

We and our 7,000 guests honored the officers and enlisted personnel of the Illinois, who represent the very best of our nation and Navy. We know they and their ship will serve our country long and well.

Illinois is the most recent example of Electric Boat's commitment to our core values – rigorous technical discipline, unyielding quality standards and stringent cost control in the production of nuclear submarines for the U.S. Navy. Our sailors and our national security demand nothing less.

**GENERAL DYNAMICS**
