

# Overview: General Dynamics Enterprise Supplier Management Portal

If you are a business interested in learning more about General Dynamics and the GD Electric Boat procurement opportunities, please click the link provided on the Prospective Suppliers page which will bring you to the General Dynamics Enterprise Supplier Management Portal. Registering in this database is your starting point for becoming a supply chain partner. Make sure to submit your company's profile of products and services. You will set up an ID and password and have the ability to update your information as needed.

This information will then be available for use by all General Dynamics business units, including Electric Boat, and their procurement personnel. If there is interest in your products, you may be contacted by a procurement representative. Registration is not a guarantee of business.

Please note the following:

- This information will be kept in a database that will be used to identify possible candidates for opportunities that arise, and is without obligation of any kind on the part of either you or General Dynamics.
- We recommend you complete only REQUIRED areas of the registration and follow directions provided on the registration landing page.
- The information you provide will enable General Dynamics personnel to view your capabilities.
- In addition to using the preselected lists of capabilities and customers, be sure to use unique and descriptive key words (e.g. "network engineering" instead of "IT") and specific customer areas (e.g. "DoD/Navy/Navsea" rather than "federal government"). Please make sure to add brands offered as well as commodities, and if you are an authorized distributor.
- Uploading corporate briefings, brochures or line cards, and other capability documents is highly recommended (Note: documents cannot contain more than 25 characters in their name and no special characters. You may need to rename documents you want to upload).
- You will be requested to update your corporate data annually, via an automated email generated from General Dynamics. Please help us in keeping our record of your company up-to-date.

For additional information or questions, please send an email to [sblo@gdeb.com](mailto:sblo@gdeb.com)
