To: Valued Electric Boat Supplier

Subject: Distribution Statements on Technical Documents

1. Electric Boat (EB) wishes to extend our gratitude for your continued efforts in helping us achieve the delivery of nuclear submarines with superb technical capabilities in support of our nation's defense. EB recognizes our standards are complex and numerous, but your continued commitment to deliver exceptional skills and products to EB has helped the U.S. Navy strengthen its undersea dominance.
2. As a reminder, compliance with instructions addressing document marking is crucial in ensuring consistent and appropriate control of information disseminated both to and from our suppliers. Pursuant to your purchase order, one of several markings that may be affixed to a deliverable is a Distribution Statement.
3. Distribution Statements are the framework for managing, sharing, safeguarding, and disseminating technical documents in accordance with policy and law. DoD Instruction (DoDI) 5230.24, *Distribution Statements on Technical Documents*, should be used as a directional guide for how and when to apply such markings. DoDI 5230.24 is available for download through the Executive Services Directorate at <https://www.esd.whs.mil/Directives/issuances/dodi/>.
4. If questions remain about implementation of DoDI 5230.24 or any other document marking or handling requirements pertaining to your purchase order, or your proprietary information, please contact our Supply Chain Compliance Group at ebc11@gdeb.com.
