Subject: Visitor Orientation Video

Beginning March 7, 2005, all visitors to Electric Boat, Groton or Quonset Point, who receive a no-escort visitors badge will be required to view a visitor orientation video. The 30 minute video provides an overview of a number of important shipyard policies and practices including in the areas of Security, Personal Protection Equipment, RadCon, Environmental and Confined Space Entry. The video will be viewed in the Visitor Control office before the individual is issued their no-escort badge.

A record will be maintained in Visitor Control of all visitors who have viewed the video. A refresher viewing of the orientation will be required on an annual basis.

If you are a visitor to Electric Boat who will be authorized no-escort access, please ensure that you schedule enough time to comply with this new requirement.

If you have any questions regarding this requirement, contact your Electric Boat host or Electric Boat Visitor Control at 860-433-1313.
