## ELECTRIC BOAT CORPORATION INDUSTRIAL SALES AND SERVICES

\*\*\*\* HOME PAGE \*\*\*\*

### **Background:**

Electric Boat Corporation facilities, technologies, and experienced personnel stand ready to serve your needs with a wide range of technical and manufacturing services as well as repair and life cycle maintenance for Marine Systems.

Electric Boat Corporation is in a position to provide a full range of material services. Our inventories of high quality, MIL SPEC material are available for high priority, short lead time tasks. Electric Boat Corporation's services are available on short notice via our INDUSTRIAL SALES AND SERVICES ORGANIZATION.

### **Points of Contact:**

We pride ourselves on rapid response to customer inquiries. Requests for additional information and/or proposals may be directed to:

Dan Mason 860/433-0278 [dmason1@gdeb.com](mailto:dmason1@gdeb.com)  
John Konig 860/433-1965 [jkonig@gdeb.com](mailto:jkonig@gdeb.com)  
Andrew Davigon 860/433-5499 [adavigno@gdeb.com](mailto:adavigno@gdeb.com)  
Tim Jenkins 860/433-5425 [tjenkins@gdeb.com](mailto:tjenkins@gdeb.com)  
Anne-Marie Luce 860/433-2570 [aluce@gdeb.com](mailto:aluce@gdeb.com)

### **KEY CAPABILITIES AND TECHNOLOGIES:**

Acoustics  
Electronic Systems Engineering and Integration  
Electrical Engineering  
Marine Engineering  
Nuclear Engineering  
Naval Architecture  
Nuclear Construction Engineering and Test  
Quality Assurance  
Research  
Research + Development – Process Related  
Manufacturing + Construction Capability  
Laboratory Services  
Technical Writing and Publication

## **ACOUSTICS**

Structural acoustic design integration, development and application of analysis tools, integration of testing and analysis techniques, designer of noise critical propulsion plants, world class acoustic resources.

## **ELECTRONIC SYSTEMS ENGINEERING AND INTEGRATION**

Command and control, communications, data processing, displays, fire control, navigation, noise and vibration monitoring, radio, sensors, sonar.

## **ELECTRICAL ENGINEERING**

Electrical system design, strategic weapons system electrical design, instrumentation and control system design, electrical system integration, advanced power electronic integration.

## **MARINE ENGINEERING**

Atmospheric control, extended operation in hostile ocean environment, high reliability in high performance systems, submerged weapons launch, underwater shock hardening, low noise operations, corrosion protection.

## **NUCLEAR ENGINEERING**

Radiation shielding, component analysis, shock/structure analysis, steam propulsion plant design, construction engineering.

## **NAVAL ARCHITECTURE**

Arrangements, structures, weights and hydrostatics, hydrodynamics.

## **NUCLEAR CONSTRUCTION ENGINEERING AND TEST**

Reactor plant testing, operations, refueling and safety, reactor services, reactor plant construction component engineering, radiological work direction, shielding installation, certification and reactor system cleanliness.

## **QUALITY ASSURANCE**

Engineering quality assurance, supplier quality assurance, manufacturing quality assurance, non-destructive testing, performance testing.

## **RESEARCH**

Computational fluid dynamics, hydrodynamics/hydroacoustics, acoustics, structural dynamics, manufacturing, CAD/CAE, CALS, combat and electronics integration, stealth, metallics and nonmetallic materials shock analysis, structural analysis, propulsion technology, operations research, artificial intelligence, neural networks, signal processing, target motion analysis, human factors, computer aided logistics support.

## **RESEARCH + DEVELOPMENT - PROCESS RELATED**

Nonferrous material welding, HY80, HY100, and HY130 welding, welding automation, composite material development and application, dimensional accuracy control, cleaning and surface preparation, environmental resource management, expert systems for manufacturing, design automation, design for producibility.

## **MANUFACTURING + CONSTRUCTION CAPABILITY**

Automated plate handling, special hull treatment facility, automated large diameter cylinder manufacturing facility, nuclear facilities, automated paint and blast facility, heavy component transport systems, major component assembly, automated welding processes (3,000 procedures and 25 materials), machine shops, lead bonding, electrical/electronic shops, pipe shops.

## **LABORATORY SERVICES**

Air flow testing, flow calibration, fresh and salt water hydraulics, shock and vibration testing, high pressure and environmental testing, oil hydraulics quiet flow testing, rotating machinery testing, electronic development, photoplotting, analytical chemistry, mechanical property testing, metallographic examination electron microscopy and X-ray microanalysis, scan testing.

## **TECHNICAL WRITING AND PUBLICATION**

System and component tech manuals, maintenance and provisioning documentation, reports, proposals, brochures, presentations, conceptual artwork and writing, publication/document design, computer-aided and optical disk publishing.

To obtain additional information, please send a request to:

Electric Boat Corporation                    *or* FAX to (860) 433-1345  
Industrial Sales and Services, D636            *or* E-Mail as listed previously.  
P. O. Box 1047  
Groton, CT 06340-1047

Please provide the following information with your request:

Company Name

Company Address

City, State, Zip

Contact name

Contact Title
